## Convenor's Message

It gives me great pleasure to present this edition of our College Magazine, which reflects the vibrant academic, cultural, and creative spirit of our institution.

A college magazine is not merely a collection of articles and pictures; it is a mirror of the thoughts, talents, achievements, and aspirations of our students and faculty. This publication stands as a testimony to the enthusiasm, creativity, and intellectual curiosity that flourish on our campus.

I sincerely appreciate the efforts of the Editorial Board, student contributors, faculty advisors, and all those who worked tirelessly behind the scenes to bring out this magazine. Their dedication, teamwork, and commitment deserve special appreciation.

I hope this magazine will inspire readers, encourage creative expression, and serve as a cherished record of our college life. I wish the magazine every success and extend my best wishes to all our students for a bright and purposeful future.

with warm regards,

**Sh. Sanjeev Kothari**

## Principal's Message

I am delighted to present this edition of our College Magazine, which reflects the academic strength, creative expression, and progressive spirit of our institution.

Our college has consistently strived for excellence in academics, co-curricular, and extracurricular activities. The achievements of our students in university examinations, sports, cultural events, research, and community outreach programs stand as a testimony to their hard work and determination. Equally commendable are the efforts of our dedicated faculty, whose commitment to quality education, mentoring, and innovation continues to shape responsible and confident learners.

Education is not merely the acquisition of knowledge, but the development of character, values, and social responsibility. Through various academic initiatives, extension activities, and leadership opportunities, our institution aims to nurture holistic development and prepare students to meet the challenges of a rapidly changing world.

This magazine is a sincere effort to document the talents, ideas, and accomplishments of our college community.

I hope this magazine will inspire readers, ignite creativity, and strengthen the sense of pride and belonging among all stakeholders. I wish our students every success in their academic pursuits and future endeavors.

With best wishes,

**Dr. Rita Jain**

## योग प्राण है, जीवन है –

रोज उठो, जागो, योग से दूर भागो मत,  
भाग – भाग कर , यूँ ही रातों जागो मत।  
थोडा ठहरकर पानी में भीगों मत,  
प्राणायाम ना करके, प्राणों को फूँको मत।  
दर- बदर की ठोकरें खाओं मत,  
थोडा -सा योग करके इटलाओं मत।  
योग प्राण है, जीवन है,  
जीवन है, तभी तो ये जहान है,  
तभी तो योग को प्रणाम है।  
थोडा-सा सांस अंदर-बाहर करके,  
ध्यान में डूबकी लगा करके,  
जीवन में प्राण वायु की ज्योति जला करके,

## \*फैशन : खुद का अंदाज\*

फैशन बस कपड़ों का खेल नहीं,  
ये रोज- रोज खुद को नया देखने का तरीका है।  
कमी जींस और टी- शर्ट में आराम मिलता है,  
तो कमी सूट या साडी में अलग ही आत्मविश्वास।  
कमी हम ट्रेंड के पीछे भागते है,  
कमी खुद का ट्रेंड ही बना लेते है।  
फैशन में सबसे अच्छा पल वही होता है,  
जब आइने में देखकर लगे-  
'हां, आज में अच्छी लग रही हूँ।'  
ये सब मैकिंग, कैंलर , सिटिंग की बातों से ज्यादा,  
मूड और फील का मामला है।  
कमीहम लाऊड होकर बोलते है,  
कमी शांत रहकर भी स्टाइलिश लग जाते है।  
और सबसे अहम बात-  
फैशन उतना ही खूबसूरत है,  
जितना हम खुद मान लेते है।

**\*फैशन रिसर्च\***

फैशन रिसर्च यह समझने में मदद करते हैं कि ट्रेंड कैसे बनते हैं। लोग क्या पसंद करते हैं और बाजार किस दिशा में जा रहा है। इसमें उपभोक्ता व्यवहार, संस्कृति, सामाग्री और नई तकनीकों का अध्ययन किया जाता है।

उदाहरण के तौर पर zara जैसी ब्रांड ट्रेड और मार्केट रिसर्च का इस्तेमाल करके ग्राहकों की पसंद को समझती है और जल्दी से नई कलेक्शन लॉन्च कर देती है। इसी वजह से वे लगातार अपडेट रहती है।

आज फैशन रिसर्च में स्थिरता डिजिटल फैशन और नैतिक उत्पादन जैसे विषयों पर भी ध्यान दिया जा रहा है, ताकि उद्योग अधिक जागरूक और जिम्मेदार बन सके।

**Artificial Intelligence  
in  
FASHION**

Artificial Intelligence (AI) is becoming important in the Fashion industry. It helps designer create new ideas by studying trends, colours, and what people like. AI also makes online shopping better by suggesting outfits and sizes based on customer preferences.

Production has also improved with AI.

It helps companies predict how much stock to make so less waste is produced. Virtual try- on tools allow customers to see how clothes will look on them without wearing them physically.

For students, AI shows how Fashion and technology can work together. It also creates new career opportunities in digital fashion and data- based design. Overall, AI is making fashion smarter, faster and more creative.

### Effect of Air Conditioners on Biodiversity

The widespread use of air conditioners contributes indirectly to biodiversity loss. ACs consume large amounts of electricity, often generated from fossil fuels, leading to increased greenhouse gas emissions. This accelerates climate change, which alters habitats, disrupts migration patterns, and increases extinction risks for many species.

Refrigerants used in AC systems, especially those with high global warming potential, can leak into the atmosphere and further contribute to global warming. Rising temperatures affect sensitive ecosystems such as coral reefs, forests, and polar regions, reducing species diversity.

Additionally, AC units release heat into the surrounding environment, contributing to the urban heat island effect. Higher urban temperatures can disturb local flora and fauna, affecting breeding, feeding, and pollination activities.

Manufacturing and improper disposal of AC units also cause habitat degradation and pollution.

In conclusion, while air conditioners provide human comfort, their energy use and emissions indirectly threaten biodiversity. Sustainable cooling practices and energy-efficient technologies are essential to reduce their environmental impact.

### Reintroduction Projects in India: A Beacon of Hope for Conservation

A reintroduction project is a conservation effort where a species is released back into its natural habitat, often to reestablish a population that's declined or become extinct in that area. The goal is to restore ecological balance and promote biodiversity. This involves careful planning, habitat preparation, and monitoring to ensure the species thrives. India has been actively working on various reintroduction projects to conserve and protect its rich biodiversity. One notable example is the “**Asiatic Lion Reintroduction Project**”, aimed at establishing a second independent population of Asiatic lions at the “**Kuno National Park**” in Madhya Pradesh. This project is crucial as the current population of **Asiatic lions** is confined to the “**Gir Forest National Park**” in Gujarat, making them vulnerable to diseases and other threats. Another successful reintroduction project is “**Project Cheetah**”, which aims to reintroduce the extinct cheetah species to India. In September 2022, African cheetahs were released into their natural habitats in Kuno National Park, marking the world's first intercontinental translocation of a large carnivore for conservation purposes. Other Notable Reintroduction Projects are “**Project Tiger**”, launched in 1973, this project has led to a significant increase in the tiger population, with over 3,167 tigers across 50 reserves. These reintroduction projects demonstrate India's commitment to conservation and protecting its unique wildlife. By establishing new populations and habitats, these projects aim to ensure the long-term survival of various species.

**Digital Startups: Shaping the Future**

Digital startups are transforming the modern world by combining innovation with technology. A digital startup is a young enterprise that uses digital tools such as mobile applications, websites, cloud computing, and social media to offer products or services. These startups focus on solving real-life problems in smarter, faster, and more affordable ways. For students and young entrepreneurs, digital startups provide exciting opportunities to turn ideas into reality. They encourage creativity, teamwork, and skill development in areas like coding, digital marketing, design, and data analysis. With limited resources but strong ideas, startups can reach a global audience through the internet. Digital startups also contribute to economic growth by creating jobs and promoting self-employment. However, challenges like competition, funding, and cybersecurity must be addressed carefully. In today's digital age, startups play a vital role in driving innovation and empowering youth to become future leaders of change.
